SUMMARY

Results-driven Software Developer with hands-on experience in building responsive and scalable web applications using React, TypeScript, and Material UI. Skilled in developing modern user interfaces, integrating REST APIs, and improving application performance and user experience. Passionate about writing clean, maintainable code and collaborating in agile teams to deliver efficient digital solutions. Seeking opportunities to contribute to innovative projects while continuously expanding technical expertise.

PROFESSIONAL EXPERIENCE

Faimsoft Technologies

Software Developer Intern

December 2025 - Present

- Developed and maintained responsive web application components using React.js, TypeScript, and Material UI.
 - Implemented modern and reusable UI components to improve user experience and application performance.
 - Integrated REST APIs and managed data fetching using tools like RTK Query.
 - Worked on features such as user lists, loaders, sliders, and smooth navigation to enhance front-end functionality.
 - Collaborated with team members using Git and GitHub for version control and pull requests.
 - Debugged and resolved front-end issues to ensure smooth functionality across different devices and browsers.
-

EDUCATION

Bachelor of Technology (B.Tech)
MGM University, chh.Sambhajinagar, India

MAY 2026

PROJECTS

Notes Hub

- Developed a full-stack web-based note management application enabling users to create, edit, organize, and delete personal notes efficiently.
- Implemented secure user authentication and authorization for personalized access and data protection.
- Integrated rich-text editing features to enhance content creation and usability.
- Designed a responsive and user-friendly interface to ensure seamless experience across devices.
- Structured the application for scalability and maintainability using modern development practices.
- Built to support students and professionals in managing and accessing information in a centralized platform.

Pharmaceutical Supply Chain Management

- Designed and developed a blockchain-based system to enhance transparency, traceability, and security in the pharmaceutical supply chain.
- Implemented smart contracts using Solidity to record and validate transactions on a tamper-proof distributed ledger.
- Built backend services using Node.js to manage data flow and system operations.
- Ensured end-to-end traceability of pharmaceutical products from manufacturer to end-user, reducing the risk of counterfeit drugs.
- Focused on improving data integrity, trust, and compliance within the supply chain ecosystem.

TECHNICAL SKILLS

- **Frontend:** React.js, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3.
- **API & State Management:** REST APIs, RTK Query.
- **Backend:** Node.js.
- **Database:** Basic knowledge of SQL.
- **Tools & Version Control:** Git, GitHub.
- **Development Concepts:** Responsive Web Design, API Integration, Component-Based Architecture, Debugging.
